

# How RS Logistics issued eBLs with confidence with WAVE BL

## Meet RS Logistics

RS Logistics is a fast-growing customer-oriented firm in the logistics industry. Founded in 2003, RS Logistics began in Hong Kong, their corporate headquarter with a vision to provide worldwide logistics services to its clients. Today, RS serves various destinations and became one of the leading logistics providers from the major ports in PRC and South East Asia.

### Tip For Others

Consider the benefits of working on a singular platform that provides secure visibility to all members of your supply chain. The results are felt both in the short-term and long-term.

RS Logistics

## Challenge

2019 brought unforeseen challenges to the maritime logistics industry. The COVID-19 pandemic drew an emphasis on the need for digital disruption to keep the supply chain moving forward. RS Logistics had pressing priorities to reduce manual work and improve delivery time with an alternative to paper-based workflows that was safer than issuing original Bills of Lading manually.

“We have completely eradicated the issue of loss of valuable documents and threats of forgery. Before WAVE BL, we worked with multiple carriers on multiple platforms when receiving the Master Bill of Lading, which cost us a lot of time to standardize. Utilizing the WAVE BL network has increased our efficiency and workflow effectiveness by 70%.”

RS Logistics

## Strategy

WAVE BL supplied RS Logistics with a digital platform that safeguarded an electronic version of the original Bill of Lading from any threats of loss or manipulation based on the blockchain-backed infrastructure in which it lived. The eBL was issued electronically and directly through the WAVE BL network where every member along the supply chain would exchange the eBL and other trade documents passed along the transaction, safely and securely.

## Solution

With paper-workflows now living in a digital environment, RS Logistics experienced a significant reduction in delivery time of original bill of lading, and avoidance in the risk of missing documents.

“We were looking for something that was safer than sending an original bill of lading the old-fashioned way.”

RS Logistics

## Results

Since onboarding with WAVE BL, RS Logistics has completely eradicated the issue of loss of valuable documents and threats of forgery. Before WAVE BL, the logistics provider worked with multiple carriers on multiple platforms when receiving Bills of Lading, which cost a lot of time to standardize. Today RS Logistics has one system in place for all of their documents exchange processes with WAVE BL.
